## Discover the Sacred History 'The Da Vinci Code' Is Still Hiding!

by [RTIROnline](#) on Thu 01 Jun 2006 12:00 PM EDT | [Permanent Link](#)

The furor ignited by The Da Vinci Code made the book a mega-seller and even sparked a precedent-setting lawsuit, but many people believe it barely brushes the surface of a centuries-old truth that the Catholic Church is still trying to deny. Ordained minister **Karen Tate** says that while traditional Christianity relegates women to a mere supporting role in the life of Jesus, she's unearthed overwhelming evidence that for thousands of years, God was a woman.

In fact, says Tate, around the world many millions of people continue to directly worship God in female form. And as more Americans step outside conventional religions in the search for divine meaning in their own lives, she finds them actively embracing this female side of God — the Sacred Feminine — that people have worshipped for more than 20,000 years.

Tate will reveal:

- The five holiest sites in the world.
